

Appl. No 10/728,596
Amdt. dated April 12, 2005
Reply to Office action of June 29, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-27 (Canceled)

Claim 28 (Currently Amended) A portable communicator comprising:

a wireless communication device that is wirelessly connected to a public communication channel and conducts transmission and reception through the public communication channel;

a computer that outputs control commands to the wireless communication device, enters data from the public communication channel through the wireless communication device and transmits data to the public communication channel through the wireless communication device;

a display that shows predetermined images sent by the computer;

a display controlling device to show a ~~standby-for-reception~~ status report of the portable communicator on the display;

another display controlling device to show receive data on the display; and

a display switching device that switches a display of the ~~standby-for-reception~~ status report and a display of the receive data.

Claim 29 (Currently Amended) A portable communicator comprising:

a wireless communication device which is wirelessly connected to a public communication channel and conducts transmission and reception through the public communication channel;

a computer which outputs control commands to the wireless communication device, enters data from the public communication channel through the wireless communication device and transmits data to the public

communication channel through the wireless communication device;

a display which shows predetermined images sent by the computer;

a display controlling device to show a ~~standby-for-reception-status~~
report of the portable communicator on the display;

another display controlling device to show a telephone menu on the display; and

a display switching device which switches a display of the ~~standby-for-reception-status~~ report and a display of the telephone menu.

Claim 30. (Currently Amended) A portable communicator comprising:

a wireless communication device that is wirelessly connected to a public communication channel and conducts transmission and reception through the public communication channel;

a computer ~~which~~that outputs control commands to the wireless communication device, enters data from the public communication channel through the wireless communication device and transmits data to the public communication channel through the wireless communication device;

a display that shows predetermined images sent by the computer;

a display controlling device to show a ~~standby-for-reception-status~~
report of the portable communicator on the display;

another display controlling device to show transmit data; and

a display switching device that switches a display of the ~~standby-for-reception-status~~ report and a display of the transmit data.

Claim 31 (Currently Amended) A portable communicator comprising:

a wireless communication device ~~which~~that is wirelessly connected to a public communication channel and conducts transmission and reception through the public communication channel;

a computer ~~which~~that outputs control commands to the wireless communication device, enters data from the public communication channel through the wireless communication device and transmits data to the public communication channel through the wireless communication device;

a display ~~which~~that shows predetermined images sent by the computer;

a display controlling device to show a ~~standby-for-reception~~ status report of the portable communicator on the display;

another display controlling device to show a map; and

a display switching device which switches a display of the ~~standby-for-reception~~ status report and a display of the map.

Claim 32 (Currently Amended) A portable communicator comprising:

a wireless communication device ~~which~~that is wirelessly connected to a public communication channel and conducts transmission and reception through the public communication channel;

a computer ~~which~~that outputs control commands to the wireless communication device, enters data from the public communication channel through the wireless communication device and transmits data to the public communication channel through the wireless communication device;

a display ~~which~~that shows predetermined images sent by the computer;

a display controlling device to show a ~~standby-for-reception~~ status report of the portable communicator on the display;

another display controlling device to show an application selection screen; and

a display switching device which switches a display of the ~~standby-for-reception~~ status report and a display of the application selection screen.

Claims 33-37 (Canceled)
